SYMBOLIC MEANING OF COLORS IN THE ORIENTAL CULTURE

Kvitkova M. M.

PhD in Philology, Associate Professor,
Senior Lecturer at the Department of Oriental Philology,
Taurida National V.I. Vernadsky University
Kyiv, Ukraine

Brent Berlin and Paul Kay, in their classic study of colors “Basic Color Terms: Their Universality and Evolution” published in 1969, suggest the existence of color universals, “which relate to the historical development of all languages in such a way which can be called evolutionary” [1, pp. 2–3).

As the researchers explain, the increase in the number of basic colorants can be seen as part of an overall increase in vocabulary and as a response to an information-rich cultural environment, because color notation did not emerge much later than language itself [2, p. 69].
