IZDEVNIECĪBA  
**BALTIJA**  
PUBLISHING

The monograph is published by the European publishing house “Izdevniecība “Baltija Publishing” (Riga, Latvia) and recommended for printing by the institution’s academic council. Three reviewers, who are

mentioned in the monograph’s output data, guarantee an independent review.

The monograph is awarded **ISBN** that permits authors to participate in developing the collective scientific paper published in the country of the EU.

**DOI** is assigned to every article included in the collective monograph that allows the authors to find their scientific work on the [Open Ukrainian Citation Index \(OUCI\)](#) site, which was developed by specialists of the State Scientific and Technical Library of Ukraine on behalf of the Collegium of the Ministry of Education and Science of Ukraine.

The monograph will be available on the website of the European publisher “Izdevniecība “Baltija Publishing” [at the link](#).

The authors of the collective monograph’s section receive an electronic layout of the collective monograph and a certificate.

### Key Dates:

**The submission of application forms and articles for publishing in the monograph:** before February 7, 2025 (inclusively).

**Feedback on papers acceptance:** within 1–2 working days after papers receipt.

**E-mail distribution of the monograph’s layout and the certificate:** after April 25, 2025.

### Registration Procedure:

To publish contributions in the collective monograph, authors should act as follows:

1. **fill in an application form** and send a manuscript to [soc@cuesc.org.ua](mailto:soc@cuesc.org.ua) for peer-review **before February 7, 2025**;

2. send a copy of the payment confirmation following the manuscript's approval for publication.

**Re:** Collective monograph on philosophy of science.

## Monograph's target subject-matter:

The monograph's concept is based on the study of the phenomenon of science in the historical and philosophical context:

- The phenomenon of science and the main forms of scientific knowledge.
- Pre-science, classical, non-classical and post-classical science in the history of philosophical thought.
- ]Socio-cultural globalization, transformations of scientific knowledge, and the postmodern paradigm in contemporary philosophical thought.
- Global problems of modern science.
- The growing role of philosophical methodology in the scientific horizon.
- Specifics of the philosophical interpretation of natural science and socio-humanities knowledge. Interdisciplinary research. Science, engineering, technology. Philosophy of artificial intelligence.
- Ethos of science and scientist. Moral responsibility of a scientist in the modern world.

The authors are proposed to prepare materials following the above sections. The monograph's concept allows the authors to conduct an analytical work in terms on studying philosophy of science in its historical-philosophical manifestations. Following its subject, the consideration can take place both in the historical and philosophical areas, timescale, and from the standpoint of any field of philosophical and scientific knowledge. Thus, the historical and philosophical insight will allow analyzing and conducting philosophical reflection on the research subject at the theoretical level, and immersion in situations of the socio-cultural horizon will allow realizing the practical component of the study. The proposed logic will allow the authors to explore the world in detail through the prism of scientific knowledge, in its historical and philosophical formation.

We would like to draw attention to the interdisciplinary nature of the research methodology, which should be based on various areas of scientific humanities: cultural studies, history, anthropology, linguistics, sociology, social studies of technology, etc. Therefore, the authors are free to apply various research methods: comparative, structural, critical, analytical, interpretation, etc.; empirical research methods, theoretical research methods, general logical methods of scientific research, as well as structural-functional, probabilistic methods, modeling, formalization, etc.

## Academic integrity

We kindly note that the monograph's languages are Ukrainian, English, and Latvian. It is prohibited citing and including in the reference list russian-language contributions published in any country, incl. papers written in other languages but published in russia and belarus.

### Requirements for Articles' Execution:

An article should be a holistic document of scientific content that involves the results of the author's original researchers.

The volume of the monograph subsection should be at least 15–30 pages. A4 paper format, line space – 1,5; Times New Roman, 14 size; all margins – 20 mm.

**3 persons** are a maximum number of authors.

**Languages:** Latvian, English and Ukrainian.

### Article general structure:

Monograph section name; author's surname and initials in the publication's language.

A paper should have the following structure: a short introduction (1–2 pages), 2–3 equally weighted sections and conclusion (1 page), summary: 7–10 sentences in the article's language (to indicate a range of problems and research results).

The article must have per-page citations as well as References at the end. Citations should be indicated with a number without brackets and dots using Microsoft Word references.

To improve the quality level of scientific citations in the scientometric database Open Ukrainian Citation Index (OUCI), it is important to indicate **DOI** for every source which it has.

**Attention!** References are in a source language and executed taking into account the National Standard of Ukraine DSTU 8302: 2015 “Information and documentation. Bibliographic reference. General principles and rules of composition”.

Author's full name and information: scientific degree and rank, post, affiliation; address of employment place (in English regardless of the publication's language).

**Attention!** In case of submitting a non-English article, an author should additionally submit an English name of the section and its structural elements (subsections) (see a design sample).
