*corresponding author

Introduction. The Introduction section should comprehensively provide the background and objectives of the research.

Materials and Methods (if any). This section presents details of the methodology used and information on any previous efforts with corresponding references.

Experimental Materials (if any). This section should include experimental data, facts, and practical development from a theoretical perspective.

Results. The important and main findings of the study should be in this section. The tables, figures, and references should be presented in sequence to emphasize the important information or observations related to the research.

Conclusion. Section summarizing the content of the abstract, providing the outcome of the research, and/or suggesting further study on the subject.

Funding (if any). Authors should indicate the funding sources of their manuscripts by providing the name of the funding organization or financial support along with the assigned grant/award number.

References (if any). The formatting of references should adhere to the international APA style (American Psychological Association).

Keywords: from 5 to 8 keywords related to the topic

N.B.! In some cases (for example, if the abstracts are of a review nature or are devoted to methodological aspects of implementing integrity systems in universities or organizations), free choice of the abstract's content is allowed.
